

## THE 3R MANTRA FOR SUSTAINABILITY RECYCLE. REUSE. REDUCE.

### Recycle

We have collaborated with Toyota Tsusho Group and established a joint venture named Maruti Suzuki Toyotsu India Private Limited (MSTI) for vehicle dismantling and recycling facility in India.

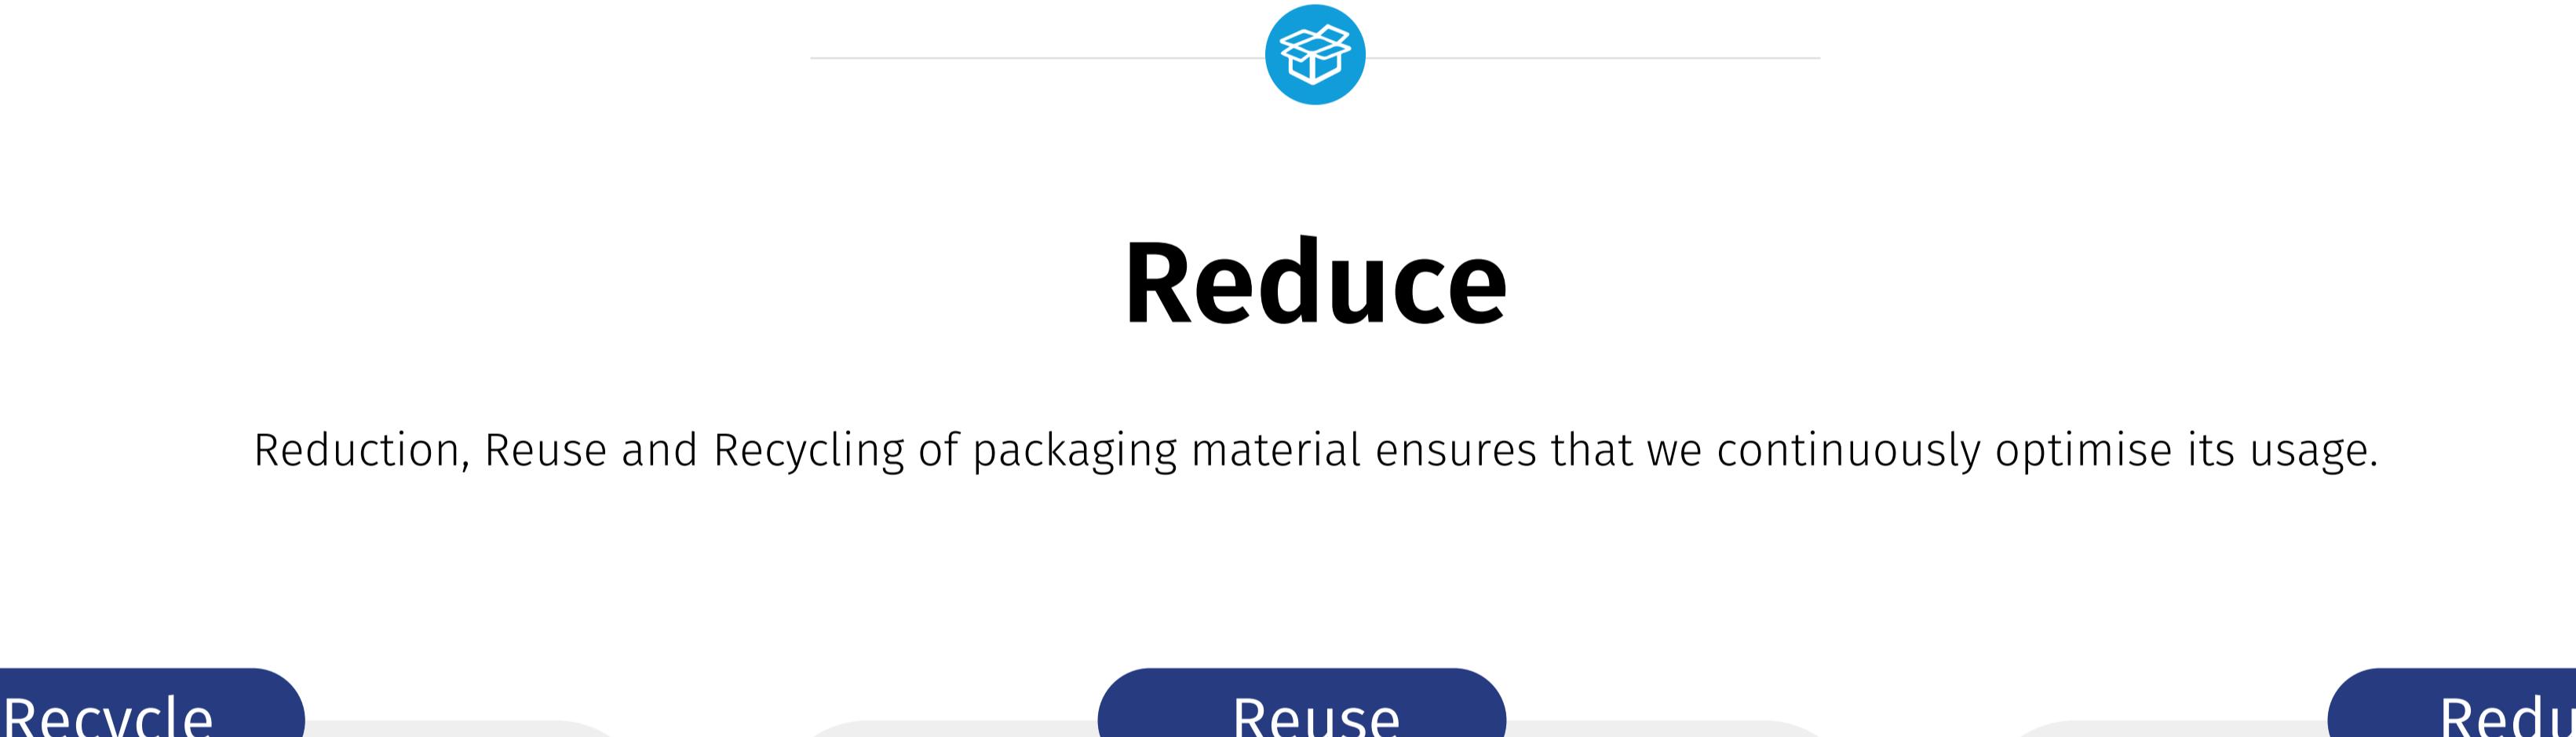

In the first 6 months of its functioning, about 100,000 kg of steel, 19,000 kg of aluminium could be recovered from the cars that were scrapped.

### Reuse

Through yield improvement projects, the Company as well as its supplier reduced the consumption of steel by about 4,300 tonnes in the year gone by.

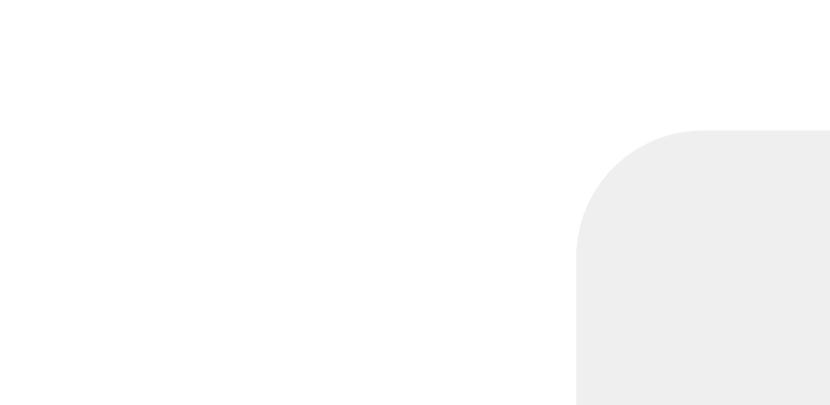

What's more, 100% of waste generated in steel was reused as inputs.

### Reduce

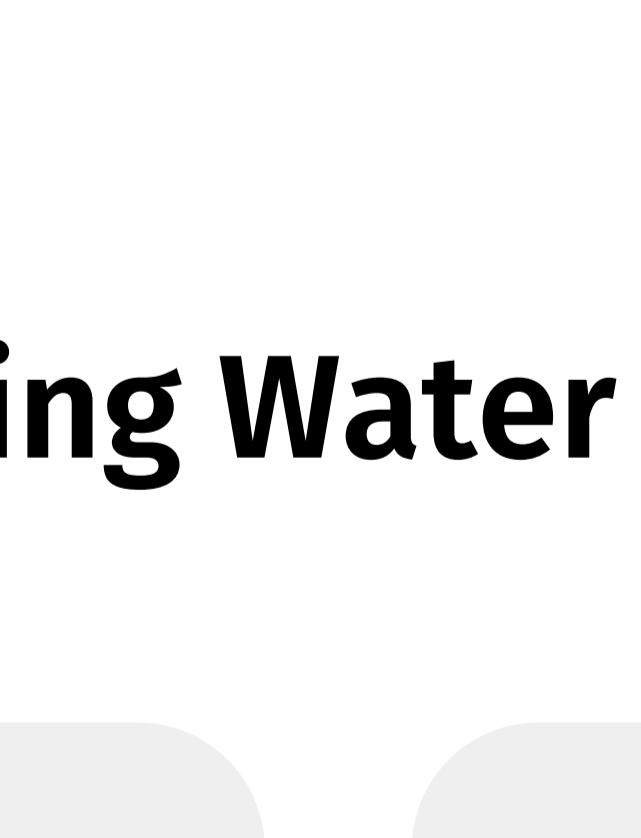

Reduction, Reuse and Recycling of packaging material ensures that we continuously optimise its usage.

#### Recycle

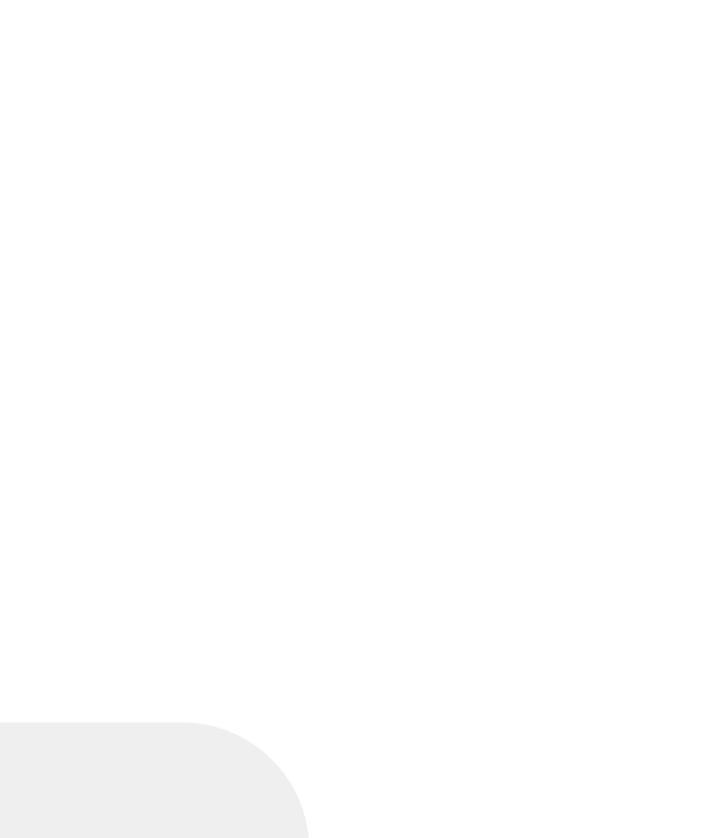

Nearly 25% reduction in usage in old vs. new models of Celerio & Brezza.

#### Reuse

68% of the packaging materials used in component (KD) exports is met through reuse in FY 2021-22.

#### Reduce

1,191 MT of packaging materials sold to authorised recyclers in FY 2021-22.

## Preventing Water Wastage

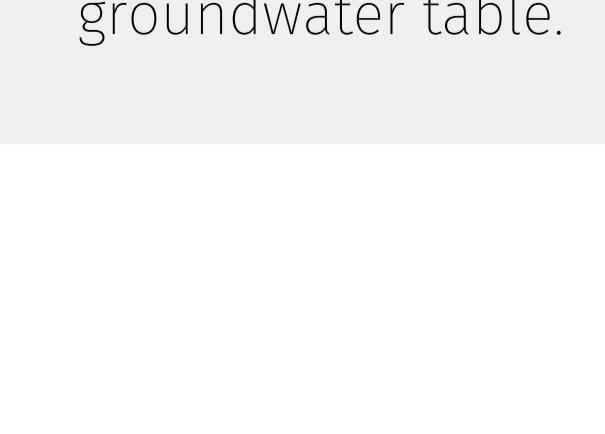

3,200 million litres

of water recycled and reused.

1,350 million litres

of water saved through dry-wash technology for cleaning cars at the workshop.

233

recharge wells used to rejuvenate the groundwater table.

Zero use

of ground water in manufacturing facilities.
